Jeyakavin J.

SUMMARY

Software development specialist with an expertise in Android and Java development, experience with Amazon Web Services as well as knowledge on various other domains.

SKILLS

Python · Java · HTML5 · CSS · Javascript · jQuery · BootStrap · LAMP · Git · Android · Data Structures · Amazon Web Services ·

PROJECTS

hbpac.club — *Website*

Website that contains key organization information for the Performing Arts Committee and their members. Created using HTML5 and CSS frameworks such as Bootstrap. PHP backend for automated page generation. LAMP stack used for hosting via web server, personally undertook task of going to cloud using AWS services.

Clink — *Android Application*

Many people are moving towards living a cashless life, and with this the task of giving money out to individuals becomes cumbersome. We made this easy with an android app that allows you to set-up peer-to-peer transactions using INTERAC's REQUEST API. API calls are made using REST architecture and entire app is designed using the Android stack.

Communicate. — *Start-up Project, Android Application*

Project based on starting conversations. Uses AWS machine learning services to create a translator that works in real-time as conversations are happening.Created as a serverless application using Amazon Lambda and Amazon S3 to store data, and the Android stack for UI as well as user input.
